EPIDEMIOLOGICAL COMMENTS

Coordinates modified to protect confidentiality as required by South African legislation. This event started as a SAT-2 event. During October 2025 a SAT-1 strain also started to appear. Not every outbreak could be typed and therefore all untyped outbreaks were reported as part of the SAT-2 event (Event 3738). During the first part of 2026 it became evident that the SAT-1 strain has become the more prevalent strain. Therefore from 15 May 2026 all new untyped outbreaks will be reported as part of this SAT-1 event (Event: 6930) Note 22/06/2026: the outbreaks ob_190286 and ob_189790 have been deleted from this event after the country provided additional information
