EPIDEMIOLOGICAL COMMENTS

Coordinates modified to protect confidentiality as required by South African legislation. Note 08/05/2026: the outbreak FMD_KZN_2021_880 (ob_180283) has been deleted from this event as it was a suspicion later confirmed to be negative. During October 2025 a SAT-1 strain also started to appear. Not every outbreak could be typed and therefore all untyped outbreaks were reported as part of this event. During the first part of 2026 it became evident that the SAT-1 strain has become the more prevalent strain. Therefore from 15 May 2026 all new untyped outbreaks will be reported as part of the SAT-1 event (Event: 6930) Note 22/06/2026: the outbreak ob_179311 has been deleted from this event after the country provided additional information
