EPIDEMIOLOGICAL COMMENTS

As part of active surveillance to determine the extent of foot-and-mouth disease, the Rapid Response Team and local veterinary services collected tissue samples from a dairy farm and a flock of sheep exhibiting symptoms of the disease, noting that the affected flocks had not been previously vaccinated. The tissue samples were processed for shipment to the Italian reference laboratory as FTA cards. Brescia, 16/07/2026 The sequenced viruses belong to the O/ME-SA/SA-2018 lineage. The closest related sequences available in GenBank to the 1,050-nt query sequence were IRAQ/KURDISTAN-GARMIAN H2/2025 (PV602085), NEP/68/2021 (PQ654490), and O/GER/BB/1/2025 (PV446528), sharing 96.50%, 96.22%, and 96.12% nucleotide identity, respectively, with the sequenced viruses.
