EPIDEMIOLOGICAL COMMENTS

Coordinates modified to protect confidentiality as required by South African legislation. This event started as a SAT-2 event. During October 2025 a SAT-1 strain also started to appear. Not every outbreak could be typed and therefore all untyped outbreaks were reported as part of the SAT-2 event (Event 3738). During the first part of 2026 it became evident that the SAT-1 strain has become the more prevalent strain. Therefore from 15 May 2026 all new untyped outbreaks will be reported as part of this SAT-1 event (Event: 6930) Note 22/06/2026: the outbreaks ob_190286 and ob_189790 have been deleted from this event after the country provided additional information. Note on 31/07/2026: Outbreak ob_190849 has been deleted from this event after the country provided additional information. Note 06/08/2026: the outbreaks ob_190843 - FMD_GAU_SAT1_2025_414 (reported in error), ob_189382 - FMD_GAU_SAT1_2025_073 (duplicate) and ob_189716 - FMD_GAU_SAT1_2025_127 (duplicate) were deleted from this event.
