EPIDEMIOLOGICAL COMMENTS

Six wildlife abattoirs were approved and registered by the National Veterinary Services (NVS). The NVS conducted post-mortem inspections of all killed animals during hunting season (May to August/Sept 2026). A total of 698 animals were inspected. The majority were antelopes and then a few warthogs and wildebeest. 196 samples were tested with NSP ELISA with negative results. Susceptible wildlife species are only allowed to move between game/nature reserves within the FMD Guard Area. Carcasses are moved after a period of maturation in the abattoirs. Hides/skins are allowed to move within the FMD Guard Area.
